Summary

Highly skilled Symfony PHP Developer with 5+ years of experience building scalable and user-centric web applications. Proven expertise in leveraging React.js for front-end development, ensuring seamless integration with robust back-end systems. Passionate about crafting clean, efficient, and maintainable code that adheres to industry best practices. Collaborative team player with a strong focus on delivering high-quality solutions that meet and exceed client expectations.

Skills

Technical Skills:

* **PHP:** Expert proficiency in PHP, including object-oriented programming, design patterns, and best practices.

* **Symfony:** Extensive experience developing web applications using the Symfony framework, including routing, controllers, services, and Doctrine ORM.

* **React.js:** Strong foundation in React.js, including component-based architecture, state management, and API integration.

* **JavaScript:** Proficient in JavaScript, including ES6+, DOM manipulation, and asynchronous programming.

* **HTML5 & CSS3:** Solid understanding of HTML5 and CSS3, including responsive design principles and cross-browser compatibility.

* **Databases:** Experience working with relational databases, particularly MySQL, including query optimization and database design.

* **Version Control:** Proficient in Git, including branching, merging, and pull requests.

* **Testing:** Experience writing unit tests, integration tests, and end-to-end tests.

* **API Design & Integration:** Skilled in designing and consuming RESTful APIs.

* **Deployment:** Familiar with deployment strategies and tools, including Docker and AWS.

Soft Skills:

* **Teamwork:** Proven ability to collaborate effectively with cross-functional teams, including UI/UX designers, product managers, and other developers.

* **Communication:** Excellent communication skills, both written and verbal, with the ability to clearly articulate technical concepts.

* **Problem-Solving:** Strong analytical and problem-solving skills, with a focus on identifying and resolving technical challenges.

* **Self-Motivation:** Highly motivated and able to work independently as well as collaboratively.

Experience

[Previous Job Title] | [Company Name] | [Dates of Employment]

* Developed and maintained scalable web applications using Symfony 4 and React.js for [Company Name]'s [Project/Platform Name], resulting in [Quantifiable accomplishment e.g., 20% increase in user engagement].

* Implemented and optimized front-end user interfaces using React.js, ensuring a smooth and responsive user experience across various devices.

* Collaborated with UI/UX designers to translate wireframes and mockups into functional and visually appealing web interfaces.

* Utilized Doctrine ORM for database interaction, designing and optimizing complex database queries for improved performance.

* Wrote comprehensive unit, integration, and end-to-end tests to ensure code quality and stability.

* Participated in regular code reviews, contributing to a culture of continuous improvement and knowledge sharing within the team.

* Successfully migrated [Project Name] from [Previous framework/technology] to Symfony 4, resulting in [Quantifiable benefit e.g., improved performance, reduced development time].

[Previous Job Title] | [Company Name] | [Dates of Employment]

* [List 2-3 bullet points highlighting key achievements and relevant skills, aligning with the job description].

Education

[Degree Name] | [University Name] | [Graduation Date]

* [List 1-2 relevant courseworks or projects that align with the job description].

Projects

* **[Project Name]:** [Brief description of project, highlighting the use of Symfony, React.js, and other relevant technologies]. Available at [Project URL].

* **[Project Name]:** [Brief description of project, highlighting the use of Symfony, React.js, and other relevant technologies]. Available at [Project URL].
