Customized Resume:

Praveen Nagaraj

[Phone Number] | **[Email Address]** | **[LinkedIn URL]** | **[Portfolio URL]**

Summary

Highly motivated and results-oriented Symfony PHP developer with 5+ years of experience in building scalable and user-friendly web applications. Proven expertise in leveraging React.js for crafting engaging user interfaces and delivering optimal user experiences. Passionate about clean coding practices, optimization, and collaborative development environments. Seeking a challenging role within a dynamic team to contribute to the development and maintenance of high-quality web applications.

Skills

Programming Languages: PHP, JavaScript, HTML, CSS, SQL
Frameworks & Libraries: Symfony, React.js, jQuery
Databases: MySQL, PostgreSQL
Version Control: Git
Cloud Platforms: AWS, Heroku
Testing: PHPUnit, Jest
Agile Methodologies: Scrum, Kanban

Experience

[Job Title] | [Company Name] | [City, State] | [Date Range]

* Developed, tested, and maintained a scalable food delivery platform using Symfony and React.js, resulting in a [quantifiable result, e.g., 20% increase in user engagement].
* Collaborated with UI/UX designers to implement modern and responsive web designs for the platform, ensuring seamless user experiences across different devices.
* Optimized application performance using caching techniques and database query optimization, leading to a [quantifiable result, e.g., 15% reduction in page load time].
* Actively participated in code reviews, ensuring code quality and adherence to established standards.
* Effectively debugged and resolved issues within the application, improving overall performance and user satisfaction.

[Previous Job Title] | [Company Name] | [City, State] | [Date Range]

* Built a robust cryptocurrency price tracking application using React.js and a real-time API, delivering accurate and up-to-date price information to users.
* Implemented a secure authentication system using JWT (JSON Web Tokens) for the application, ensuring user data protection.
* Developed a comprehensive testing suite using Jest to guarantee code quality and prevent regressions.

[Previous Job Title] | [Company Name] | [City, State] | [Date Range]

* Designed and implemented a fully functional CRUD (Create, Read, Update, Delete) application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
* Developed and deployed the application on Render.com, showcasing expertise in cloud platform deployment.
* Integrated a payment gateway using Stripe, allowing users to make secure online payments.

Education

[Degree Name] | [University Name] | [City, State] | [Graduation Date]

Projects

* **Net-Flixx Clone (React.js, Netlify):** Developed a fully functional clone of Netflix using React.js, demonstrating proficiency in component-based development and state management.
* **Food Delivery Platform (Symfony, React.js, Render.com):** Designed and built a scalable food delivery platform with a responsive user interface, showcasing expertise in backend and frontend development.
* **Cryptocurrency Price Tracker (React.js, Netlify):** Built a real-time cryptocurrency price tracking application using React.js and a third-party API, demonstrating proficiency in data fetching and real-time updates.

Note: The resume has been customized by:

* Adding the relevant skills from the job description to the Skills section.
* Modifying the Summary to highlight the candidate's experience with both Symfony and React.js.
* Updating the Experience section to focus on responsibilities and achievements that directly relate to the job description, such as developing scalable web applications, collaborating with UI/UX designers, and optimizing application performance.
* Adding a Projects section to showcase the candidate's technical expertise and independent work.

Remember to replace the bracketed information with the candidate's actual details.
